Hands down one of the most professional tree removal services I had to deal with. We had to remove trees from my parents' properties in the past and other companies just never cared about the job the way Tree Menders did. They came in on time, did the job quickly and cleaned up after the job was done. Highly recommend them!

Our Toronto property is fairly small and there's not much space to maneuver around, especially when removing a large old elm tree. However, Tree Menders were very careful and did a fantastic job cutting down the tree, and cleaning up after the job.

Arbana was very friendly on a call while taking down all the information and providing a quote. And Evan did an excellent job cutting down the old tree that was too close to power lines. My husband is a bit chatty but Evan didn't mind at all, he was super friendly and took his time explaining all the nuances of what had to be done. We are very happy with the price and how quickly Evan's team handled the job.

I was getting landscaping done and needed some tree removed. Thankfully Evan and his team were able to accommodate my short timelines.

I was very pleased with their work. It took under an hour for them to remove the old dying tree and they were very professional and respectful.
